

XL Outdoor Series

TECHNICAL INFO

Dimension	1.000 X 1.000mm
Thicknesses	30mm / 43mm
Tolerances	Width $\pm 1\%$ Length $\pm 1\%$ Thickness $\pm 5\%$
Bulk Density	
Top Layer approx.	1.400 Kg/m ³ otp 1168, pn-en iso 845:2010
Sub Layer approx.	1.000 Kg/m ³ otp 1168, pn-en iso 845:2010
Shock Absorption	61% en 14808
Vertical Deformation	5 mm en 14809
Head Injury Criteria (HIC) test	1,3 m en 1177
Slip Resistance	
Dry Conditions	≤ 105 ptv
Wet Conditions	≤ 75 ptv pn-en 13036-4:2004
Thermal Resistance	approx. 0,16 M2.K/w
Abrasion Resistance, MG	≤ 560 pn-en iso 5470-1:2001
Tensile Strength, MPA	$\leq 0,65$
Elongation at break, &	≤ 40 pn-en 12230:2005
Hardness	55 up to 75 pn-iso 868 pn-93 / c-04206
Eu fire classification	EF1

Compliance with content of pentachlorophenol • Antistatic floor covering

HIGH DENSITY TILES MADE FROM 100% RECYCLED RUBBER ENGINEERED FOR THE RIGORS OF OUTDOOR TRAINING SPACES.

The high impact absorbing recycled rubber fitness tiles are made and designed for any freeweight and/or functional area.

The standard rubber tile has a 2-layer system; the bottom consists of coarse granules and the top layer of 5mm consists of finer granules.

These tiles are manufactured in the EU and consist solely out of recycled European car tires, bonded with PU.

The two different type of bottom structures are specifically designed to guide (rain)water through and away from the training area.

PRODUCT SPECIFICATION

XL Outdoor Series

Drainage channels mitigate risk of water pooling underneath the tile.

Textured surface allows for greater grip, even in wet conditions.

Dowl connectors allow for a fast and efficient installation.

The 43mm tile gives a deeper channel for water to runaway.

The 100% recycled rubber material is a durable and more eco-friendly option to traditional outdoor tiles.
